

BOYA JANARDHAN

JAVA | SPRING BOOT | MICROSERVICES | ANGULAR

+919603449343 | boyajanardhan.dev@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Java Full Stack Developer with 4+ years of professional experience designing, developing, testing, and supporting enterprise applications using **Java, Spring Boot, Microservices, REST APIs, Angular, TypeScript, Apache Kafka, MySQL, Redis, Docker, Kubernetes, Jenkins, and AWS**. Strong backend expertise in **Spring MVC, Spring Security, JWT, Spring Data JPA, Hibernate, SQL, API design, event-driven architecture, caching, performance optimization, and unit testing**. Experienced in Agile delivery, code reviews, debugging, production issue resolution, CI/CD, and end-to-end feature development.

TECHNICAL SKILLS

Backend: Java 8/11/17, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT

Architecture & Integration: Microservices, Spring Cloud, API Gateway, Eureka, Feign Client, Resilience4j, Circuit Breaker, Event-Driven Architecture, Design Patterns

Frontend: Angular, TypeScript, HTML5, CSS3, Bootstrap, Reactive Forms, HttpClient, RxJS, Routing

Messaging & Cache: Apache Kafka, Redis

Database: MySQL, JPQL, Database Design, Query Optimization

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, Kubernetes, Jenkins, CI/CD

Testing & Tools: JUnit 5, Mockito, Maven, Git, GitHub, Swagger/OpenAPI, Postman, Jira, IntelliJ IDEA, VS Code

Monitoring: Prometheus, Grafana, ELK Stack

PROFESSIONAL EXPERIENCE

Software Engineer | Trysol Global Services | Hyderabad, India Oct 2024 - Present

Project: ASOS - Online Fashion & Apparel Shopping Platform

- Developed and maintained 8+ Spring Boot microservices and **RESTful APIs** for Product and Order domains, supporting order creation, status updates, order history, pagination, filtering, validation, and exception handling for an application serving 10K+ daily active users.
- Implemented backend business logic using Java, **Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and MySQL** with clean Controller-Service-Repository separation, supporting 15+ REST endpoints across Product and Order modules.
- Implemented Spring Security with **JWT** authentication and role-based access control (**RBAC**) across 3 user roles (Admin, Vendor, Customer) to secure APIs and restrict administrative operations, eliminating unauthorized access incidents in production.
- Integrated **Apache Kafka** for asynchronous, event-driven communication; implemented order-event producers and notification consumers for order confirmation workflows, processing 5K+ events daily and reducing order-processing latency by 30%.
- Implemented **Redis** caching for frequently accessed product data, reducing database reads by 40% and improving average API response time by 35% (from ~450ms to ~290ms).
- Designed Product and Order schemas and **JPA** relationships using **@OneToMany** and **@ManyToOne** across 10+ entities; optimized **JPQL** queries and database access patterns, reducing average query response time by 25%.
- Contributed to **Angular** features using **TypeScript**, components, services, routing, **Reactive Forms, HttpClient**, and **Bootstrap** to integrate frontend workflows with Spring Boot REST APIs.
- Created JUnit 5 and Mockito unit tests for positive and negative scenarios, achieving 80% code coverage; documented and tested 15+ APIs using Swagger/OpenAPI and Postman.
- Worked with **AWS EC2, RDS, and S3** and supported application delivery using **Maven, Git/GitHub, Jenkins CI/CD, Docker**, and **Kubernetes**.

Engineer | L&T Technology Services | Hyderabad, India May 2023 - Oct 2024

Project: Claims Processing System

- Developed and maintained a **Java/Spring Boot** backend for insurance claims processing, building 10+ RESTful APIs (Spring MVC, Bean Validation, centralized exception handling) covering claim submission, status tracking, and validation for 5K+ policyholders.
- Implemented persistence using **Spring Data JPA, Hibernate, MySQL**, entity mappings, repository queries, **JPQL**, and **transactional** service operations across 8+ core claim and policy entities.
- Developed 50+ **unit tests** using **JUnit** and **Mockito** for service-layer business logic, achieving 75% code coverage, and documented/tested 10+ REST APIs using Swagger/OpenAPI and Postman.
- Used Maven, **Git/GitHub, Jira**, and **Agile/Scrum** practices for feature development, bug fixes, code reviews, debugging, integration testing, and release support, contributing to biweekly sprint releases with a 90%+ on-time delivery rate.

Associate | ZETA IT Innovations | Bangalore, India Aug 2022 - May 2023

- Completed structured training in Java, SQL, Spring Boot, REST APIs, and Git while developing internal proof-of-concept applications to strengthen practical development skills.
- Supported internal technical activities, including debugging, documentation, unit testing, code reviews, and knowledge-sharing sessions while awaiting project allocation.

EDUCATION

Bachelor of Engineering | Bheema Institute of Technology and Science, Andhra Pradesh, India | 2019 - 2022
